Bibliographic Description

ICPSR Study No.: 21660

Title: New York Police Department (NYPD) Stop, Question, and Frisk Database, 2006

Alternate Title: NYPD SQF Database

Principal Investigator(s): New York Police Department

Funding Agency: New York Police Department

Bibliographic Citation: New York Police Department. NEW YORK POLICE DEPARTMENT (NYPD) STOP, QUESTION, AND FRISK DATABASE, 2006 [Computer file]. ICPSR21660-v1. New York Police Department [producer]. Ann Arbor, MI: Inter-University Consortium for Political and Social Research [distributor], 2008.

Scope of Study

Summary: These data were originally collected by New York Police Department officers and record information gathered as a result of stop question and frisk (SQF) encounters during 2006. These data were used in a study carried out, under contract to the New York City Police Foundation, by the Rand Corporation's Center on Quality Policing. The release of the study, "Analysis of Racial Disparities in the New York Police Department's Stop, Question, and Frisk Practices" (Rand Document TR-534-NYCPF, 2007) generated interest in making the data available for secondary analysis. This data collection contains information on the officer's reasons for initiating a stop, whether the stop led to a summons or arrest, demographic information for the person stopped, and the suspected criminal behavior.

Subject Term(s): police, police citizen interactions, search and seizure

Smallest Geographic Unit: precinct

Geographic Coverage: New York City, New York (state), United States

Time Period: 2006

Date(s) of Collection: March 2007

Unit of Observation: police-citizen encounter

Universe: All street encounters between New York Police Department officers and citizens within New York City resulting in completion of NYPD form UF250 (Unified Form 250) during 2006.

Data Type: administrative records data

Data Collection Notes: At the request of the NYPD, several variables were removed from the original data file. These variables reflected notes made by NYPD officers during stop-question-frisk encounters, and thus contained potentially identifying information about officers and suspects.

Methodology

Sample: inap.

Weight: none

Mode of Data Collection: record abstracts

Response Rates: Not applicable.

Presence of Common
Scales: none

Extent of Processing: CDBK.ICPSR/ CONCHK.ICPSR/ DDEF.ICPSR/ FREQ.ICPSR/
MDATA.PR/ REFORM.DATA/ UNDOCCHK.ICPSR

Access and Availability

Extent of Collection: 1 data file + machine-readable documentation (PDF) + SAS setup file
+ SPSS setup file + Stata setup file

Restrictions: This data collection may not be used for any purpose other than statistical reporting and analysis. Use of these data to learn the identity of any person or establishment is prohibited.

Data Format: Logical Record Length with SAS, SPSS, and Stata setup files, SAS transport (CPORT) file, SPSS system file, Stata system file, and tab-delimited ASCII data file

Original ICPSR Release: 2008

Note: Detailed file-level information (such as LRECL, case count, and variable count) may be found in the file manifest.
